Before the construction of a borehole in Mityana, Uganda, this lake of dirty water was the only source of water for 7km. It was used for all purposes, including for watering animals causing a variety of infections and diseases.

Transform Africa supports poor communities to have increased access to water through the construction of boreholes, wells and dams, and helps them improve sanitation and hygiene.

Together with BIVA (the local partner) Transform Africa was able to construct this water borehole. Within months, there was a huge improvement of health and wellbeing of those who used it.

Transform Africa’s great work continues at this Muslim school in which BIVA also built a water borehole.
Our Work focuses on 4 Key Areas

1. Water and Sanitation
2. Livelihoods
3. HIV and Health
4. Youth Training for Employment

Who we are

Transform Africa (TA) is a UK registered charity incorporated as a company limited by guarantee in 1999. Based in London, its main focus is to empower local communities and organisations in Africa to tackle poverty and its root causes through sustainable and transformative approaches.

It is an African/Diaspora-led organisation (a majority of our trustees are of African origin), guided by clear values and with an emphasis on equal partnerships. This helps us to:

- Draw on our linkages, local expertise and experience
- Find good local partners who are rooted in their communities
- Tackle sensitive issues (e.g. local partner governance and leadership)
- Reach the most disadvantaged
- Be innovative in adapting existing approaches

Fundraising

Transform Africa is raising money through GlobalGiving for a project in rural Uganda. The aim of the project is to alleviate rural poverty and water-related ill-health. It will be located in Busimbi, Mityana District and Kitenga, Mubende District in Uganda. The project will benefit about 3,000 people through increased access to safe, clean water.

Find out more.

Our Mission

To empower local communities & organisations in Africa to tackle poverty, and its root causes, through sustainable & transformative approaches.

Our Vision "Africa free from poverty and social injustices"

£10—Will pay for water testing for the construction of one borehole

£16—Will provide training for one water User Committee which will manage the boreholes

£29—Will provide the upkeep for three workers on one borehole.

£49—Will provide casings for two boreholes.
